

Jon Segovia

FRONTEND-DEVELOPER

ABOUT:

All my life I was being prepared for this moment. Why? because all the experience that I acquired across the years, leading and sharing with big groups, turned me into an empathetic person who can get involved with people's needs. I hope to find a place where these skills can be developed in-depth and people are valued above all else.

EXPERIENCE

NEWSAN 2006 - 2017 (Consumer electronics)

LEADER

- Supervision of staff
- Organization of daily tasks
- Control of technological products

BORDERLESS-SOFTWARE 2021-2022 (IT)

PROJECTS

HENRY 2021

ACADEMIC PROJECT COUNTRIES APP

[HTTPS://COUNTRIES-APP-ROAN.VERCEL.APP](https://countries-app-roan.vercel.app)

Development of a SPA(Single Page Application) using React and Redux for the Front-End, styled with CSS modules. It consumes data from an external API (restcountries) through a BackEnd developed in NodeJs using Express and a relational DataBase in Postgress using Sequealize as the ORM. Some features of the project are: Different types of Filters, a search bar, and a controlled form to create your own recipe.

HENRY 2021

ACADEMIC PROJECT WEB SERVICES APP

[HTTPS://PF-WEB-SERVICE.VERCEL.APP](https://pf-web-service.vercel.app)

E-commerce. Developed together with a team of 8 people. We use Trello and GitHub. This app points to offers sales of services. Some of the features implemented: Backend with Express and relational table models with PostgreSQL / Sequelize. Front-end part with React / Redux, Registration, Login, Payments (MercadoPago, Paypal), Material UI, Admin panel, User Panel, chat, filters for services, dark mode, and responsiveness for the whole app.
